

Staticmaster®

Microbalance Ionizers and Brushes

2U500 microbalance ionizer

1U400 microbalance ionizer

BF2- 1000 positioner

3C500 3" brush

1C200 1" brush

When weighing fine powders and fibers, the balance chamber must maintain a stable static free environment to assure accurate results. The problem of "fly-away" powders and inaccurate weighing is eliminated with the **2U500** and **1U400 microbalance ionizers**, because they utilize proven alpha ionizing technology. These devices can be easily mounted within the balance chamber, assuring quick and accurate measurements.

Static isn't a problem when weighing filters with the **Duostat™ BF2-1000** because it completely eliminates any charge on both sides of the filter. The result is increased accuracy and efficiency for reliable and repeatable weighing.

Also utilizing alpha ionizing technology to eliminate static in a wide variety of industrial, photographic and medical applications are the **3C500** and **1C200 static neutralizing brushes**.

These ionizing brushes are hand-crafted with soft, natural hair that is safe to use with even the most delicate lens coatings, film emulsions and magnetic media.

Note on Ion Source

All NRD ion sources are encapsulated in precious metals by means of a patented process. This results in a static eliminator which resists oxidation, solvents, heat, cold and vibration.

Notice: NRD warrants that these materials are reasonably fit for the purpose described. We believe that specifications and technical information presented are based on test methods that produce accurate results. The foregoing limited warranty is expressly made in lieu of, and no other express and no implied warranty of merchantability or fitness for a particular purpose is made. NRD, LLC, will not be liable for incidental, consequential, special, exemplary or punitive damages. The limited warranty will not apply to defects or damage due to accidents, neglect, misuse, alterations, error or failure to properly maintain, clean or repair products.
