Ionizing Cartridge Positioners

(Model BF2-1000 and BF1-500)

Duostat™ BF2-1000 Positioner

The Duostat™ BF2-1000 Positioner when combined with two (2), 2U500 Ionizing Cartridges (sold separately) is the ideal tool for removing static charge from filter media and fine powders prior to placing them into the weigh chamber. Utilizing the Duostat™ BF2-1000 system results in increased weighing accuracy and efficient, reliable measurement.

Unistat™ BF1-500 Positioner

The enhanced BF1 Positioner now includes a ground wire attachment to connect to the 2U500 ground tab and includes the model 5060 Ground Kit. By adding the ground kit, the performance of the positioner is greatly enhanced. The Unistat BF-1 quickly and effectively removes static charges from powders, filters, and other thin membrane materials that need to be precisely weighed. The positioner's flexible neck make this device convenient to use in any laboratory setting.

Note: The BF1-500 requires the use of one (1) 2U500 ionizing cartridge sold separately.
